Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM
THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Claim Rejections - 35 USC § 112

1. Claims 1-5 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

a. The claims 1-5 are are narrative in form and replete with indefinite and functional or operational language. The structure which goes to make up the device must be clearly and positively specified. The structure must be organized and correlated in such a manner as to present a complete operative device. The claim(s) must be in one sentence form only. Note the format of the claims in the patent(s) cited. The claims are generally narrative and indefinite, failing to conform with current U.S. practice.

b. The following claims lack proper antecedent basis:

i. In claim 1 all limitations after the second period lack antecedent proper antecedent basis. Also multiple periods claims 3-4 create antecedent problems.

ii. The preambles in the dependent claims are not reciting a device or apparatus and the preamble does not recite the invention claimed in the independent claim 1.

iii. In claims 3-5, "its" is recited and the limitation that its refers to should be positively recited.

- c. The following claims are vague, indefinite, confusingly and awkwardly worded:
- iv. "&" in claims 2, 4 and 5, render the claims indefinite because such symbols are not appropriate.
 - v. "or" appears in claim 4 but limitations cannot be claimed in the alternative.
2. Regarding claim 1, the phrase "or the like" renders the claim(s) indefinite because the claim(s) include(s) elements not actually disclosed (those encompassed by "or the like"), thereby rendering the scope of the claim(s) unascertainable. See MPEP § 2173.05(d).

Conclusion

3. **No art could be applied to the claims because not all of the limitations could even be considered because of the multiple periods. Therefore, the invention while understood from the specification, It is not understood in view of the claims. The claims are what provide the patent protection and as written they do not convey an invention which can be treated by art. Some of the limitations are would be treated but part of it would not and these limitations make the dependent claims not understandable as well.**
4. Glaser et al is the closest art in terms of reading the invention. Please review this Patent when you amend and rewrite the claims.

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Steiner et al, Taylor, Handler et al, Siemers et al, Wang, Brickner jr et al, and Everts et al disclose an invention.
